City of Fort Worth Adopts *InformaOne*

San Antonio, TX, May 2013 - Informa Systems, Inc., today announced that the City of Fort Worth has selected Informa Systems as their e-Learning Management System.

Fort Worth is one of the largest cities in Texas and the 16th largest city in the United States. As part of the city's rapid expansion, a system was needed to manage the complex training needs and requirements of the 2,000 sworn and civilian employees.

InformaOne was selected by Fort Worth since it met several critical needs; the ability to provide classroom scheduling, supervisor approval and sign-off and an officer portal that provides a single location for all of the officer's training and certification needs. Furthermore, the ease-of-use of the one-click approach in *InformaOne*, significantly improved the acceptance of the new system.

InformaOne is an integrated product that can track and manage all common training and learning functions so that clients can easily and quickly develop, deploy, manage and communicate using a common user interface. This unified approach yields much greater return on investment (ROI).
