Texas Alcoholic Beverage Commission (TABC) selects *InformaOne*

San Antonio, TX, June 2014 - Informa Systems, Inc., a leader in compliance training, tracking and reporting, announced today that TABC adopted the *InformaOne* system to ensure training and certification compliance at their widely dispersed locations throughout the state of Texas.

The Texas Alcoholic Beverage Commission (TABC) is a state agency that regulates all phases of the alcoholic beverage industry in Texas and has numerous regional offices throughout the state. It has onerous training requirements as a result of the complex regulations governing the sale of alcohol in the state.

For TABC, the need was to manage their intensive training requirements and to support approvals of training requests through the chain of command. This is accomplished using the *InformaOne* approval and certification system. All training requests are now routed to the responsible official with the ability to securely digitally sign.

InformaOne delivers a highly automated and secure tracking and reporting system at an affordable cost. It combines the benefits of a full array of training management functionality - including documents, courses, certification, records, and retention management - on one platform. This unified approach yields much greater return on investment (ROI). *InformaOne* makes it possible to consolidate all documents and training records into a single and flexible online repository.
