Urban League to use *InformaOne* to help meet needs of underserved communities

San Antonio, TX, Oct 2013 - Informa Systems, Inc., today announced that the Springfield Urban League has selected *InformaOne* as their Learning Management System (LMS) to manage the delivery of learning to their members.

The mission of the Urban League is to empower African-Americans, other emerging ethnic groups and those who struggle to secure economic self-reliance, parity, power and civil rights. “The *InformaOne* system will help the Urban League meet their training needs, and since the system is hosted, there is minimal setup or configuration required,” says Ann Konzal, senior sales consultant for Informa Systems.

One of the requirements of the Urban League was to have flexibility within the system at an affordable cost. It combines the benefits of a full array of training management functionality - including document, course, certification, records and retention management on a single platform. This unified approach yields much greater return on investment (ROI). *InformaOne* makes it possible to consolidate all documents and training records into a single and flexible online repository.
